1. MANUFACTURES.

Definition of Factory.—A factory for statistical purposes is an industrial establishment in which four or more workers are employed or in which mechanical power is used.

Average Number of Workers.—This information has been compiled in two ways—(a) average number over the whole year, i.e., the number of persons required for a full twelve months to do the work actually done by individual factories during the periods they were operating; and (b) average number over the period of operation, i.e., the sum of the figures for individual factories of the average number of persons working during the period the factory operated.

Value of Output.—This represents the selling value at the factory of all products manufactured during the year, whether sold or held in stock.

Value of Production.—This figure is arrived at by deducting from the value of output the cost of raw materials, containers, fuel, light, power, oil, water, tools replaced, and repairs to buildings and plant. It has been agreed upon by the Australian Statisticians as being the best estimate at present obtainable of the contribution of factories to national wealth production. It is still subject to deductions for depreciation, and for postage, advertising, and similar expenses. Subject to these deductions, it represents the fund which provides wages and salaries, profits, interest, and rent.

Table No. 1.
SUMMARY OF FACTORY STATISTICS.

(NOTE.—In this table heat, light, and power factories (Class 16) are included.)

Surplus (to cover Interest, Drawings, Profit, Depreciation, &c.) .. %	13-44	15-01	14-95	15-58	15-19
<i>a</i> Value of Production per Worker .. £	462	494	559	645	690
Value of Production per Head of Mean Population £	27-92	32-20	38-05	47-18	52-75

a Figures on lines marked thus refer to, or are dependent upon, average number of workers over the whole year.

b Figures on lines marked thus refer to average number of workers over the period during which the factory was in operation.

c Excluding drawings by working proprietors.

d Book values, less any depreciation reserve in respect of them, as stated by factory proprietors.

e Excluding electric motors (64,851 H.P. in 1949-50) used in factories where the electricity was generated by themselves. The prime movers only are included.

f The amount of depreciation on buildings, machinery and plant, as stated on returns, was £2,796,479 for 1949-50.

a In addition to the figures shown, there were engines of 5,700 H.P. driven by water power (in electricity stations), and electric motors of 64,851 H.P., used in factories where the electricity was generated by themselves. In the latter case, the prime movers only were included.

b Book values, at end of year, less any depreciation reserve in respect of them, as stated by factory proprietors.

^a This table does not include details of the operations of plywood mills and case mills.

^b Average over whole year, including working proprietors.

^c Excluding drawings by working proprietors.

^d Owing to changes in the collection form, these figures are not strictly comparable between years.

^e Including the rough-sawn timber used for further manufacture in the mill.

^f Included as equivalent rough-sawn timber in Rough-sawn Timber columns.
